

AGRICULTURAL BUFFERING AGENT

AQUA-RIGHT 5®

GENERAL DESCRIPTION: A water-soluble buffer for specific use with those agricultural chemicals whose optimal performance in spray water require a pH 7. Also contains a wetting agent to ensure adequate wetting of all plant surfaces.

Mix Aqua-Right 5 with water before adding any other foliar.

Aqua-Right 5 contains an organic buffering system that when applied correctly will buffer the majority of spray solutions between a pH of 6,5 – 7,2 depending on water quality.

Aqua-Right 5 contains a sequestering agent that inactivates harmful salts in solution of Ca and Mg.

Aqua-Right 5 contains a wetting agent to improve the wetting, spreading and contact of the remedy on the sprayed plant surface.

Aqua-Right 5 contains humectant activity that retards the rate of spray droplet evaporation from the plant surface.

Aqua-Right 5 helps prevent the rapid degradation of alkaline sensitive remedies.

Aqua-Right 5 contains a buffering system that when applied correctly will bring down pH of the water between a pH of 4-6 depending on its quality.

DIRECTIONS FOR USE: Use only as indicated

Aqua-Right 5 is for use with those agricultural remedies that require a neutral environment for optimal performance.

Aqua-Right 5 with the spray tank water before adding any other agricultural remedies.

Recommended Application Timing

WATER QUALITY		APPLICATION RATE
Good	pH 6-7 EC 0-500 ms	50ml / 100L water
Average	pH 7-8. EC 500-1000 ms	75ml / 100L water
Poor	pH >8, EC > 1000 ms	100ml / 100L water

Phytotoxicity: Non phytotoxic. However, It is always advisable to check on a small area especially if tank-mixed with other products.

Compatibility : Compatible with most of the commonly used fertilizers and pesticides except those that are alkaline in nature. Not to be applied with growth retardants or herbicides.

Pack Sizes: 1 litre, 5 litres
