

WHO CLASS III

OSHOTHANE PLUS

FUNGICIDE

75WG

Guarantee: **Mancozeb 750g/kg**
 Formulation: **Water dispersible granules**
 Classification: **Alkylenebis (dithiocarbamate)**

General Description

OSHOTHANE PLUS 75WDG is a broad-spectrum protective fungicide that controls a wide range of fungal diseases on a variety of crops.

Advantages of Oshothane Plus 75 WDG

- It has optimum coverage per application as compared to WP formulations, hence a better efficacy.
- It has stable suspensibility over a longer period.
- **It has superior dispersibility, which minimizes the stains / residues on the crop.**
- It is dust free, has little inhalation hazard and is easier to measure - so more friendly to sprayers.
- There is no clogging and abrasion in the nozzles.

Mode of Action

Non-specific thiol reactant, inhibiting respiration. Fungicide with protective action.

Recommended Application Rates

Crop	Diseases	Rates
Roses	Downy mildew, Black spot & Botrytis	1.5 - 2.0kg/ha
French Beans	Anthracoese, Angular leaf spot & Botrytis	40g/20L (1.5 - 2kg/ha)
