

WHO CLASS II

SHUJAA[®] 70WP

FUNGICIDE

Guarantee: **Dithianon 70%**
Formulation: **Wettable powder**
Classification: **Quinone**

General Description

SHUJAA is a broad-spectrum organic, foliar fungicide with protective action as well as some curative action.

SHUJAA is effective in the control of rust, blights, scab, downy mildew and leaf spots on a variety of crops including flowers and vegetables.

Mode of Action:

Multi-site mode of action. Affects a range of fungal enzymes by reacting with thiol groups and, interfering with cellular respiration. It has strong antispore and translaminar action.

Due to its multi-site action, SHUJAA offers longer protection from diseases and is not prone to build-up of resistance.

Recommended Application Rates

Crop	Diseases	Rates	Spray Interval
Vegetables, e.g. French beans	Rust, Anthracnose	30-40g/20Lt 1.5-2kg/ha	
Flowers, e.g. Carnation	Rust	1.5-2kg/ha	

Pre-harvest Interval: 14 - 21 days.

Other Suggested Uses

Crop	Diseases	Rates
Cabbage	Leaf spots	500-750g/ha
Tomato Potato	Blights	500-750g/ha
Chillies	Anthracnose, Leaf spot	500-750g/ha
French beans	Leaf spots	500-750g/ha
Coffee	Leaf rust, Coffee berry disease	500-750g/ha

Phytotoxicity:

Non-phytotoxic to most crops when used at recommended dosages. Always try on a small scale for varietal tolerance before applying on a large scale.

Compatibility:

Compatible with most commonly used pesticides except those that are alkaline in nature. Do not mix with oil or oil sprays.

Anthracnose(Tomato)

Early Blight(Potato)

Leaf spots(Peas)

Leaf Rust(Coffee)

Late Blight(Tomato)
