

WHO CLASS III

SULCOP[®] 50 DF

FUNGICIDE

Guarantee: **90% Copper Oxychloride (50% w/w Copper Equivalent)**
Formulation: **Dry Flowable/Wettable Granules**
Classification: **Multi-site: inorganic fungicide.**

General Description

SULCOP 50DF is a broad spectrum, inorganic green copper fungicide. It is a contact, preventive fungicide for the control of a wide range of diseases such as late blight of potatoes, tomatoes and other vegetables, leaf spot diseases, Downey mildews, cankers, scab and asparagus rust etc.

It should be applied as a protective spray on foliage, stem and fruit before disease occurrence.

Features

- Superior formulation (water dispersible granules of micronized Copper Oxychloride)
- Readily disperses in water; suspends for long periods, and spreads evenly on leaves
- No need to prepare paste or slurry
- Long term and effective control
- Secondary advantage of supplying nutrients (Copper) to crops.

Mode of action

Multi-site fungicide that prevents germination of fungal spores, ultimately killing them.

Recommended Application Rates

Crop	Diseases	Rates	Spray Interval
Vegetables, e.g. French beans	Rust, Anthracnose, Bacterial blight	50g/20Lt 2.5 kg/Ha	10-14 days
Brassica	Downey mildew, Black rot, White rust	50g/20Lt 2.5 kg/Ha	10-14 days
Lettuce	Downey mildew	50g/20Lt 2.5 kg/Ha	10-14 days
Tomatoes	Early & Late blight, Bacterial spot, Anthracnose, Botrytis	50g/20Lt 2.5 kg/Ha	10-14 days
Pepper	Bacterial leaf spot	50g/20Lt 2.5 kg/Ha	10-14 days
Squash	Fusarium wilt, Anthracnose, Powdery mildew, Stem rot	50g/20Lt 2.5 kg/Ha	10-14 days
Egg plant	Alternaria blight, Botrytis, Anthracnose, Fruit rot	50g/20Lt 2.5 kg/Ha	10-14 days

Spray interval: 10-14 days **Pre-harvest interval:** 3 days

Phytotoxicity: Non-phytotoxic when used as recommended. Spot trials for varietal tolerance are however recommended.

Compatibility: Compatible with most commonly used fungicides and insecticides. However not to be mixed with mercury containing compounds, lime sulphur, dithiocarbamates, TMTD and DNC products.

Anthracnose (Tomato)

Black rot

Downy mildew (Rose)

Powdery mildew

Rust
