

WHO CLASS II

# TREMOR GR 0.05

**INSECTICIDE**

Guarantee: **Beta-cyfluthrin 0.5g/Kg**  
Formulation: **Granular**  
Classification: **Pyrethroid**

## General Description

TREMOR GR 0.05 is a granule formulated synthetic pyrethroid insecticide with contact and stomach action for the control of maize stalk borers.

## Mode of Action

Contact and stomach poison which combines a rapid knock-down effect with long lasting efficacy.

## Method of application:

TREMOR GR 0.05 granules are to be applied into maize funnels. Apply one brief shake of the applicator to the funnels of each maize plant.

## Timing of application:

Scouting for stalk borers and/or their symptoms on maize should start two (2) weeks after the crop emergence. You may notice borer's eggs/larvae or/and borer damaged maize leaves and plants. Apply TREMOR GR 0.05 into the maize funnels approximately 28 days after crop emergence. The maize plant will be about 30cm tall, or at mature person's knee high stage.

Application may be repeated 30 days thereafter, but before the crop flowering stage.

## Environment

Toxic to fish and other aquatic organisms. Do not contaminate water ways or ditches with the product or empty container.
