

ANIMATIC[®] MILKING SALVE

A true one step udder preparation cream

A creamy white to off white ointment containing lanolin and cetrimide which makes the milking process hygienic and smooth by preventing the occurrence of sores and dry cracks on the teat and udder during milking.

To be used in cattle, camels and goats.

It is advisable that the milkers hand, udder and teat be cleaned with warm water and dried with a clean cloth before applying milking salve to the hands, udder and teat of the animal.

The antiseptic properties of milking salve hasten healing and smothering of chapped udders and teats.

ANIMATIC® MILKING SALVE

A true one step udder preparation cream

BENEFITS:

- A milking gel that contains lanolin for softer and easy to milk teats,
- prevents the cracking of teats.
- Has an antiseptic that kills all mastitis causing organisms.
- Has pine oil which is a natural antiseptic and soothes the teats hence
- fast healing of wounds and abrasions.

DESCRIPTION:

Animatic milking salve contains an antiseptic, lanolin, a natural skin constituent in all animals. Pine oil is a natural antiseptic.

DIRECTIONS FOR USE:

Hand milking: To obtain the best results, the udder, teats and hands should be washed well with warm water, dry well with a clean towel and apply Animatic milking salve on the hands and massage onto the teats. After milking, apply once again.

Machine milking: Apply Animatic milking salve onto teats before inserting teat cups. Milk normally and apply once again after milking.
